Minister for Information, Communication
and Information Technology

Country Statement

The United Republic of Tanzania is pleased to announce her candidature to the ITU Council for the period of 2023-2026 representing African Region. Acknowledging ITU's commitment to connecting the world, Tanzania is well prepared to bring into the council its effort to support ITU achieve this goal. Since its membership to the ITU in 1962, Tanzania has played a major role in telecommunications transformation for Africa serving as a Member states and Council Member.

To date, Tanzania has immensely contributed to activities of the Union as a Member state and through council membership in actively leading the development of information based societies

and connecting the world through digital infrastructure development. Furthermore, Tanzania has spearheaded e-services promotion, cyber safe best practices and advocate on the use of flexible policy, legal and regulatory frameworks that adapt to change and advancement of ICT. As an ITU member state, Tanzania has invested notable efforts and resources to leverage the digital revolution in transforming into a digital economy and information society into a knowledge society.

We believe in a collaborative approach towards societal and economical transformations enabled by information and communication technologies.

As a member of the ITU Council, Tanzania will ensure the following:-

1. Cooperation

Stand actively to ensure ITU achieves its objectives through enhancing cooperation among member states, regional and international organizations.

2. Development

Ensure development of technical standards and allocation of communication scarce resources as per the guidance of the ITU advisory organs and member states resolutions.

3. Promotion

Tanzania will strongly support joint efforts among member states to promote digital connectivity by ensuring accessibility, availability and affordability of digital services especially to unserved and underserved areas across the world.

4. UN Agenda 2030 SDG's / AU Agenda 2063

Tanzania further assures ITU member states that achieving ITU objectives together will contribute as well to the success of the global agenda of transforming people's lives through achieving the United Nations Agenda 2030 for Sustainable Development Goals and the African Union Agenda 2063.

ITU as an organ uniting member states in ICT development, has always embraced consensus approach in bridging the digital divide and this has been the primary strength of the ITU since its inception that we should all strive to abide by.

Through this ITU cultural practice, Tanzania further assures ITU member states that achieving ITU objectives together will as well contribute to the success of the global agenda of transforming people's lives through achieving the United Nations Agenda 2030 for Sustainable Development Goals.

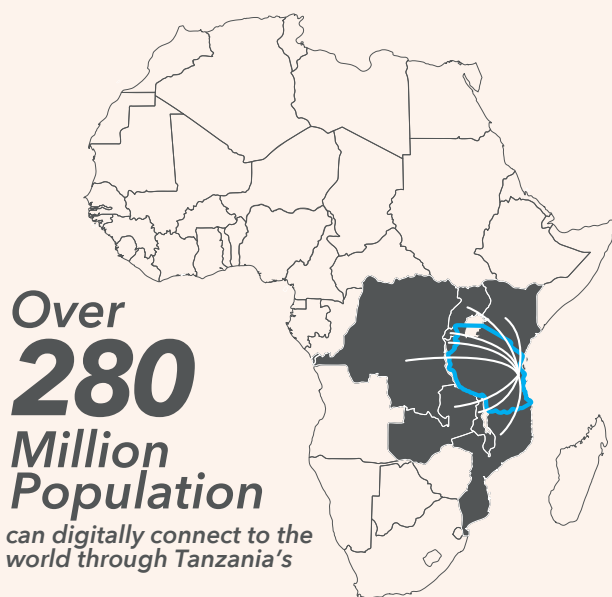

Country Overview

The United Republic of Tanzania is among Africa's leading cyber secure destinations. Tanzania serves as an ICT hub connecting the world and successfully transforming people's lives

through digital financial services inclusion leveraging on the rapid growth of telecommunications networks and advanced ICT applications.

Why Elect United Republic of Tanzania to the ITU Council Seat?

Tanzania has been an active member of the ITU for 60 years committed to adapting global consensus on the agreements and best practices of telecommunications development. Since its admission to the ITU Tanzania has immensely collaborated with other ITU member states in transforming people's lives using information and communication technologies.

Connecting the world is a primary foundation to transform people's lives. Tanzania is deploying state of

the art digital infrastructure which is facilitated by having a supportive policy and legal frameworks that promote e-services, universal access in different areas including governance, health, education, commerce and others. Some of the most used applications in Tanzania are in governance; through several e-government platforms in place; mobile financial applications; education, health and social media applications. Today, ICT is an integral part of Tanzanians' economy and the country is set to promote digital

innovation and embrace new emerging digital technologies that can safely transform people's lives and economic prosperity. Tanzania is ready to bring this motivation to the ITU administrative organ and bridge the global digital divide. Secure cyber space and reliable access of digital services is key to digital transformation and building a digital economy. Tanzania seeks to make the world a cyber-secure space while bridging the digital divide. Tanzania has made efforts to provide the world with a safe environment for digital development.

The Global
Cybersecurity
Index report
of 2020
ranks Tanzania 2nd in Africa

GCI results: Africa region

Country Name	Overall Score	Regional Rank
Tanzania	90.58	2

This is an indication of the country's ability to lead the African region on global efforts of making the world a cyber-safe environment.

Digital transformation succeeds on peers with a common goal. Since its admission to the ITU, Tanzania has been a forefront country in promoting multilateralism among member states in various global and regional organs. This is an important aspect which Tanzania assures member states that it will

prevail in the ITU in order to position ITU as a leading global organ that provides digital technical support and guidance which is the primary foundation in achieving other global and regional agendas of digitally transforming the world.

Activities & Events

Tanzania has been actively involved and participating in various ITU events such as:-

- **ITU Study Groups**
